

ANUSHKA PATIL

Professional Summary

Experienced backend developer with 1.5 years of experience in the banking domain, specializing in Java and Spring Boot applications. Proven track record in REST API development, Oracle 19c optimization, and deployment on Tomcat and WebLogic servers. Proficient in database security, including SQL injection prevention and data encryption/decryption. Strong problem-solving skills with experience automating deployments and delivering high-performance, zero-defect solutions.

KEY SKILLS

- **Backend Development** – Java, Spring Boot, Servlets, JDBC, Hibernate, JPA, Maven
- **Database Management** – Oracle, MySQL, PL/SQL, Query Optimization
- **Security Implementation** – AES-256 Encryption, JWT Authentication, SQL-Injection Prevention
- **Server & DevOps Tools** – Tomcat 9, WebLogic 14c
- **Professional Skills** – Data Analysis, Problem Solving, Communication, Adaptability

EDUCATION

Tatyasaheb Kore Institute of Engineering & Technology, Warananagar
June 2019 – June 2023
(Bachelor of Engineering in Computer Engineering)

Professional Experience

Software Engineer @TDTL, Pune

June 2024 – Present

Client: ICICI Bank

Responsibilities:

1. Served as backend developer for ICICI banking applications — Customer 360 Dashboard & IMSG.
2. Designed and implemented secure REST APIs using Java, Spring Boot, and Oracle 19c for high-volume production systems.
3. Performed query tuning and indexing in Oracle 19c, reducing API latency and improving database efficiency.
4. Ensured API-level data security through AES-256 encryption and SQL injection prevention.
5. Managed deployments across Tomcat 9 and WebLogic 14c environments.
6. Collaborated with cross-functional teams to review BRDs, test cases, and UAT feedback for production readiness.
7. Handled incident analysis and API troubleshooting by monitoring JSON/XML payloads and optimizing responses.
8. Coordinated with ICICI stakeholders for new feature requests and ensured timely delivery of business-critical APIs.

Projects (Banking Applications):

1. **Customer 360 Dashboard – ICICI Bank Hyderabad Branch**
 - Centralized banking dashboard for managing and analyzing payment and collection records from multiple systems.
 - Developed using Java, Servlets, Oracle 19c, and Flutter Flow, integrating ICICI's internal APIs such as Account Balance Check and related customer data services.
 - Implemented AES-256 encryption/decryption, SQL-injection prevention, and asynchronous background jobs for secure and efficient report downloads.
 - Designed and optimized views, materialized views, tables, and PL/SQL procedures to ensure fast and reliable data processing.
 - Successfully deployed on UAT and progressing toward production deployment on Tomcat 9.

Infrastructure Management Service Group (IMSG) – ICICI Bank Mumbai Branch

- Web-based application developed for the banking sector to streamline property onboarding and site selection for ATMs, branches, and other infrastructure.
- Built using Java, Spring Boot, Flutter Flow, and Oracle 19c; deployed on WebLogic 14c.
- Integrated PAN Validation, Aadhaar Verification, and CIBIL Score Check APIs to automate customer and property verification processes.

Software Developer Intern @iSYS Technology Solutions Pvt. Ltd., Pune
May 2023 – July 2023

Responsibilities:

1. Assisted in developing backend modules using Java, JDBC, and Spring Boot under senior developer guidance.
2. Learned and applied unit testing with JUnit and participated in team code reviews.
3. Gained practical exposure to the software development lifecycle and backend application design principles.
